Blesanda,

Inprime y crea un expediente de analysis con sampling de la barge tennesee, cliente PREPA.

En este mensaje esta la nominacion de Mark, pero manana Tanya debe pedir la orden de servicio de PREPA a Cesar sin falta en la manana.
Tanya pidela manana,pq Altol tambien estuvo muestreando y Cesar se puede confundir, llamalo y pidela verbal y luego se lo escribes, si no la recibes a las 3 vuelve y llamalo.

Mark,

PREPA already accept the sulfur results. We will be certifying the barge in order to begin the discharge into Aguirre.

Thanks!
Elvin

Mark,

Sulfur analysis for the Barge Tennessee:

Sample tested in duplicate,

Sulfur,-----> 0.498 1st Result
0.497 2nd Result

Thanks!
Elvin

Please sample the Tennessee at Aguirre and run sulfur on barge composite. Alchem is reporting a .51 and we would like to have it double-checked.

Thanks,

Mark
